

CSC 345 - Project #4: Report

When `git log --oneline > log.txt`, a text file containing all the commits pushed onto GitHub since the creation of the repository is found. Below is the log.txt file created, the top being the most recent, going to the bottom, the oldest commits.

eac7a83 EX2 type
ed583ba EX1 actual
5ae7b4f EX1
7a31c5f So i can use the VM
bfcac2b make clean
d059e93 essay.pdf added
8883605 typo fixed in main_server.c
1c606ba Checkpoint 3 working.
cf27454 checkpoint 2 complete
2eb650b 4 and 5 now working on my end
c99b4eb accepted changes, nicks 4 and 5
ae3e30f requirement 3 working
b723904 Complete Checkpoint 1: all 5 requirements done
b8b2062 Fully implementing Req 3 and 4: usernames + join/leave notif
49d8f83 checkpoint 1 req 2 working, broadcasting messages between clients.
53cb84f added pdf files
6e87b49 checkpoint 1, requirement 1: server displays up to date list of connect clients.
3ee9147 adding in files from zip
b8c8078 Initial commit

Below are also pictures of the commits from the view of our git repository.
